March 30, 2018

Dear Valued Customers:

We are pleased to announce the acquisition of the extriCARE® NPWT/wound care line from Devon Medical Products. The acquisition was finalized officially today on March 30th, 2018 and Alleva Medical Co has purchased all assets of the extriCARE® business, including, among others, its worldwide trademarks, 510k, and distribution rights.

Over the past years, Alleva Medical Co. (formerly known as Medu-Scientific Ltd) has been endeavoring to instill manufacturing, design and clinical insights into our medical suction and drainage devices. With our acquisition of the extriCARE® line from Devon Medical Products, we are excited to be entering an expanding area of specialized wound care treatment. We believe there is substantial synergy between this acquisition and the rest of our product lines.

Our vision for the extriCARE® business is for it to become one of the leading brands in NPWT. Through our technical expertise, our relentless commitment to quality, and our willingness to listen, we will strive to increase the value proposition of all extriCARE® products going forward.

For existing extriCARE® customers, we pledge our commitment to maintain a stable product supply and a high level of operational support, such that you, our customers, can have the assurance that extriCARE® products are safe, reliable and available.

In the United States, you can reach us through our new toll-free line at **1-877-312-NPWT**, or our address at 4709 Distribution Ct #2, Orlando, FL 32822. Alternatively, you can also send us inquiries through info@allevamedical.com

The entire Alleva Medical team is looking forward to continuing (or embarking) the long-term relationship that we have established with all of our customers. We are confident of the future success this new acquisition will bring.

Sincerely,

Max Choi
Chief Executive Officer
